

Funding Available to Farmers

Farm and Ranch owners, managers and operators can receive funds for equipment and management practices that reduce greenhouse gas emissions. To find a program's current funding availability and timeline, please follow the listed program link.

Alternative Manure Management Program

This program provides grants to implement non-digester practices that reduce dairy and livestock manure methane emissions, such as solid separation or conversion from flush to scrape manure collection in conjunction with a manure treatment or drying practice, compost bedded pack barns, and enhanced pasture-based management practices. Technical assistance is available.

bit.ly/AMMPcci

Community Air Protection Incentives (CAP) Program

This program provides incentives to replace older, higher-polluting vehicles and equipment with newer models that have lower emissions or zero-emission technology. The program also funds stationary and infrastructure projects.

bit.ly/CAPlcci

Clean Truck and Bus Vouchers Program (HVIP)

This program provides vouchers for the purchase or lease of clean trucks and buses with set-aside funding for public transit agencies, public school buses, drayage trucks, and small fleets.

bit.ly/CalHVIPcci

Clean Vehicle Rebate Project (CVRP)

This program provides rebates for purchase or lease of new, eligible, light-duty vehicles including electric, fuel cell, and plug-in hybrid electric vehicles.

bit.ly/CVRPcci

Community Assistance for Climate Equity (CACE)

This program supports communities in applying to California Climate Investments and other climate-related funding programs. The CACE program aims to make the process fairer for applicants that may lack the capacity to successfully access these funds, particularly those that live in the state’s most disadvantaged communities.

bit.ly/CACEcci

Community Composting for Green Spaces Grant (CCG)

This program provides grants to create, expand, and improve small-scale composting programs located in disadvantaged and low-income communities.

bit.ly/ComCompostcci

Dairy Digester Research and Development Program (DDRDP)

This program awards grants for the implementation of dairy digesters on California dairies that result in long-term methane emission reductions from dairy manure while mitigating or minimizing adverse environmental impacts.

bit.ly/DDRDPcci

Farmworker Housing Single-Family Energy Efficiency and Solar Photovoltaics (PV)

This program provides energy efficiency upgrades such as appliance replacements, insulation and lighting upgrades, solar PV, and health and safety improvements for farmworker-occupied housing at no cost to residents.

bit.ly/FHSFEESP

Food Waste Prevention and Rescue Grant Program (FW)

The purpose of this program is to lower overall greenhouse gas emissions by establishing new or expanding existing food waste prevention projects (source reduction or edible food recovery for people) in California to reduce the amount of food being disposed of in landfills. Eligibility limited to Federally Recognized Tribes in California.

bit.ly/FWPcci

Forest Health Program

This program provides grants for active restoration and reforestation activities aimed at providing more resilient forests by funding activities such as forest fuels reduction, prescribed fire, pest management, reforestation, biomass utilization, conservation easements, and/or land acquisition through the Forest Legacy Program, and research through the Forest Research Program.

bit.ly/ForestHealthcci

Funding Agricultural Replacement Measures for Emission Reductions (FARMER)

This program provides incentives to replace older, higher-polluting agricultural vehicles and equipment with cleaner options. To learn more about the program, please see the program website at bit.ly/carbFARMER or contact your local air district.

The California Air Resources Board provides funding to local air districts to administer the FARMER program for their region. Local air district contact information is available at bit.ly/FARMERdistrict.

Healthy Soils Program (HSP)

This program has two components. The Healthy Soils Incentives Program provides financial incentives for on-farm implementation of conservation management practices that improve soil health, sequester carbon, and reduce greenhouse gas emissions. The Healthy Soils Demonstration Projects showcase on-farm implementation of Healthy Soils practices to support farmer/rancher outreach and education. Technical assistance is available.

bit.ly/HealthySoilsccl

Sustainable Agricultural Lands Conservation (SALC) Program

This program provides planning and acquisition grants to protect at-risk agricultural lands from conversion to more greenhouse gas intensive uses. Funds can be used by eligible applicants to purchase conservation easements or fee titles from landowners to protect the property's agricultural uses, and/or in partnership with Tribal Entities to protect land use to promote healthy trees and perennial forbs for the cultivation of foods, herbal medicine, fibers, and dyes. Technical assistance is available.

bit.ly/SALCcci

Organics Grant Program (ORG)

Grants for projects that expand organic recycling and food recovery efforts. Technical assistance is available.

bit.ly/OGPcci

Recycled Fiber, Plastic, and Glass Grant Program

This program provides grants for manufacturing projects that expand paper, plastic, or glass recycling.

bit.ly/FPG2cci

These programs are part of California Climate Investments, a statewide initiative that puts billions of Cap-and-Trade dollars to work reducing greenhouse gas emissions, strengthening the economy, and improving public health and the environment — particularly in disadvantaged communities.
